

Out of reach

Poisonings are a cause of child hospitalisation in Western Australia. Most of these poisonings are caused by medicines such as pain relievers and sleeping tablets and other substances such as cleaning products.

Most poisonings from hazardous substances happen when a substance is not in its usual place and has just been used.

At home activity

Read through the list of medicines and household products with your child and tick the box if it is stored out of reach. You do not have to return this sheet to school.

Medicines	Is it out of reach?	Household products Is it out of reach	h?
Cough medicines		Dishwasher detergent	
Pain relievers		Oven cleaner	
Prescribed medicines eg he tablets, asthma medication	eart 🗆	Moth balls	
Antibiotics		Drain cleaner	
Sleeping pills		Furniture polish	J
Ear drops		Pool chemicals	
Cold and flu tablets		Mouse or rat bait or snail pellets \Box	
Sinus tablets		Pesticides or weed killers	
Nasal sprays		Veterinary products	
Antibiotics		Petrol, turpentine or kerosene	
			-#-

While you are checking your medicines, it would be useful to throw 'out of date' and unwanted medicines away. Make sure that all medicines are stored in their original containers and are not laying around loose.

Remember, don't refer to medicines as lollies and return all medicines to a storage place out of reach of children, immediately after you've used them.

Thank you for playing a vital role in your child's health and drug education.
