Challenges and Choices
A resilience approach to road safety education
School Drug Education and Road Aware
School Drug Education and Road Aware (SDERA) is the WA State Government’s primary drug and road safety education strategy for all government and non-government schools, and early childhood services. SDERA is a cross-sectoral initiative of the Association of Independent Schools of WA (AISWA), the Catholic Education WA (CEWA) and Department of Education (DoE) and is funded by the Mental Health Commission and the Road Trauma Trust Account.

SDERA aims to prevent road-related injuries and the harms from drug use in children and young people.

SDERA empowers early childhood and school-based staff, parents and carers, and community groups to implement effective resilience, drug and road safety education approaches within their schools and community, through the provision of professional learning, evidence-based resources, and a state-wide consultancy team.
Follow the yellow brick road ..... Dorothy, the lion, the scarecrow and the tin man followed the yellow brick road to find the Wizard of Oz who they thought would help them. What skills and characteristics do you think they needed to head off on this journey? Courage, determination, hopefulness, 'stick-ability'.....Absolutely!

Write graffiti words and phrases to describe ‘resilience’.

- problem solver
- helpful
- positive thinker
- responsible

Write your own definition of resilience

ATTITUDE IS THE DIFFERENCE BETWEEN AN ORDEAL AND AN ADVENTURE.
Unknown

A PERSON WHO NEVER MADE A MISTAKE, NEVER TRIED ANYTHING NEW.
Albert Einstein

DON’T LET YESTERDAY TAKE UP TOO MUCH OF TODAY.
Unknown
Be grateful
Try taking your focus away from negative things and spend time each day looking for something to be grateful for. It doesn’t have to be huge. Don’t forget to show gratitude to others; let them know when you appreciate something they have said or done for you.

Have a sense of control
Sometimes even getting out of bed when you are feeling down is hard work. Setting yourself some small goals and working towards these each day can help you feel in control.

Take a reality check and keep things in perspective
Be realistic. It may seem like a huge problem now, but in a few weeks not so huge. Remember, you are not alone facing the challenges of being a teenager.

Use positive thoughts
The way you think influences how you feel and what you do and say. So challenge any negative thoughts and say positive things to yourself – It’s going to be okay. I can do this. Other people have been through the same thing as me.

Walk away
If you’re feeling stressed or angry with someone, end the conversation and take yourself away from the situation. Take time to calm down. Breathe deeply. When you’re ready, work out what the problem was with the situation, what you can or can’t change, and decide what you need to do.

Look after yourself
Get enough sleep, eat well and do some things that you really enjoy. You can’t deal with problems when you’re grouchy and finding it difficult to stay awake. Listen to some music, go for a walk or try a few relaxation techniques – yoga, meditation, deep breathing.

Talk – A problem shared is a problem halved
Ask someone you trust – a friend or even your parents – to listen to what you are worried about. Write in a journal or diary each day or choose something creative to let your feelings flow such as painting or dance.

Get connected with friends, peers, family and your community
Having successful relationships and working to keep these relationships positive is important.

You can learn to be more resilient but just because you are resilient doesn’t mean you won’t feel stressed or anxious sometimes.
It’s normal to have days where you feel ‘down’ or in a bad mood. But it’s important to remember that you can have control over your moods. It shouldn’t be the other way around. Regardless of what is going on in the world around you, try practising the ABCDE of Happiness to lift your mood.

<table>
<thead>
<tr>
<th>A</th>
<th>Physical activity can help you feel good: play a game, walk, run, dance.</th>
</tr>
</thead>
<tbody>
<tr>
<td>B</td>
<td>Make sure you connect with people around you: classmates, team mates, family, friends, your teacher.</td>
</tr>
<tr>
<td>C</td>
<td>Try to commit to doing something new or set a challenge: learn a new game, read a new book, make a new friend.</td>
</tr>
<tr>
<td>D</td>
<td>Do something for someone else — it makes you feel good: a friend, your sister, brother, a parent, your teacher.</td>
</tr>
<tr>
<td>E</td>
<td>Take time to notice and appreciate things: the food you eat, things you see around you, and the people who are kind to you.</td>
</tr>
</tbody>
</table>

Write one positive thing you already do in this area to help with your happiness

Write one positive thing you would like to do in the future to help with your happiness

Happiness is not just about doing things that you like. It also requires growth and challenging yourself beyond the boundaries of your comfort zone.
Magic moments – those times when your goals are achieved and you have success, or when something happens that makes you feel great – are the times that you really need to focus on when you are feeling a bit down, stuck or uninspired.

Keep a journal of all your ‘magic’ moments. It could be a diary, a photo board, a PowerPoint or an iMovie. Remember, the magic moments don’t need to be huge. They could be:

- cooking a new recipe with your mum
- washing the dog and laughing when it sprays you with soap suds
- when your friend sends you a ‘thinking of you’ text when they knew you were feeling upset.

These are all moments that remind us that life is great.

The happiest people do not have the best of everything; they make the best of everything they have.

Write two things that have happened at school this week that made you feel good.
1.
2.

Write two things that have happened at home this week that made you feel good.
1.
2.

Write one thing someone else did this week that made you feel good.

Write one thing you did for someone else this week that made you feel good.

Write one short-term goal that you planned this year that has been achieved and explain how you made this happen.

Write one long-term goal that you are working on this year and explain how you are going to make this happen.
Did you know that how you talk to yourself affects how you feel? This doesn’t mean actually talking out loud. Self-talk is what we say to ourselves when we think about something that has already happened or about something that is going to happen.

**Shifting gears** or changing negative thoughts into positive thoughts is the key to this skill. It’s important to know that your semi-conscious internal voices can influence your moods and what you do and say.

**Shifting gears**

<table>
<thead>
<tr>
<th>Situation</th>
<th>Thoughts (self-talk)</th>
<th>Feelings</th>
<th>Actions or behaviour</th>
</tr>
</thead>
<tbody>
<tr>
<td>Jack is in Year 7 and has been chosen for a lead role in a school play</td>
<td>Jack uses negative self-talk: I’m really nervous. I’m going to stuff up my lines and everyone will laugh at me. Why did my teacher pick me to do this? This is going to be terrible.</td>
<td>Jack feels worried, angry and anxious</td>
<td>Jack treats other students disrespectfully, stares at the teacher a lot, is often late to rehearsals and gets detention</td>
</tr>
<tr>
<td>Jess is in Year 7 and has been chosen for a lead role in a school play</td>
<td>Jess uses positive self-talk: This is a bit scary but it’s exciting too. I might ask some of the others how they are feeling. Great, now I can show my friends how good I am at acting.</td>
<td>Jess feels excited, energised, happy and just slightly anxious</td>
<td>Jess makes conversations with other students, finds others in the play with similar interests, learns the lines with a friend, and greets the teacher</td>
</tr>
</tbody>
</table>

**Choose one situation.**

1. A student who is going to a new school
2. A young person who has to catch public transport to school for the first time
3. A young person learning to ride a skateboard at the skate park
4. A student who has been asked to go to the principal’s office

**Write three benefits of looking optimistically at situations and using positive self-talk.**

1. 
2. 
3. 

**Negative self-talk** is when we say negative things to ourselves.

**Positive self-talk** is when we say positive things to ourselves.
Some people think that an argument and a disagreement are the same thing. Actually, there is a big difference between the two. Do you know what it is?

Write some of the differences between having an argument and disagreeing with someone.

<table>
<thead>
<tr>
<th>Argument</th>
<th>Disagreement</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Only ignore or walk away from a disagreement if it is unimportant.</td>
<td>If it is important, you need to stand up for yourself and express your opinion. Some people are too scared to do this because they fear being yelled at or disliked. If you don’t stand up for yourself, the disagreement won’t be resolved and other people may lose respect for you.</td>
</tr>
<tr>
<td>2. Agreeing to disagree can be helpful.</td>
<td>Sometimes you might have different ideas about something and both people can be right. When this happens, and if you don’t need to make any decisions or sort things out, you can just ‘agree to disagree’.</td>
</tr>
<tr>
<td>3. Asking someone else to help you sort things out is sometimes necessary.</td>
<td>First of all you should try to deal with the disagreement but if this hasn’t worked, you might need to ask someone else to help you sort it out.</td>
</tr>
<tr>
<td>4. Being assertive is a good strategy for handling a disagreement.</td>
<td>Being assertive means speaking up about what you think isn’t fair or correct without being angry or nasty. Start what you say with the words ‘I feel’ or ‘I think’. Make good eye contact and be respectful.</td>
</tr>
<tr>
<td>5. Apologising is also a good strategy.</td>
<td>If you have been unfair or done something wrong to someone, it is helpful to apologise, even if only some of the disagreement was your fault. Apologising all the time, on the other hand, is not a good strategy.</td>
</tr>
<tr>
<td>6. Problem solving and negotiating is the best way to handle a disagreement.</td>
<td>Negotiating means that you try to work out a solution that is fair to both people and you can both live with. You should both feel that you have got some of what you wanted. By negotiating, you ensure that there is a much greater chance of staying friends and sorting things out.</td>
</tr>
</tbody>
</table>

It takes courage to sort out a disagreement.
What did completing the quiz tell you about how you manage disagreements?

What skills do you think you need to work on to be able to handle disagreements better?

Set a SMART goal that shows the steps you will take to become more capable and confident in handling disagreements. If you’re not sure how to write a SMART goal, take a look at page 11.

Calm down first and then plan how to solve your disagreement: Focus on the problem that caused your disagreement not the person.

There are always two sides to a disagreement.
**Saving face**

‘Saving face’ means the lengths that you will go to in order to avoid humiliation, embarrassment, and to maintain your dignity and preserve your reputation. It is often used to prevent friends or peers thinking badly about you.

| Write at least four ‘saving face’ strategies you have used or could use in a tricky situation. |
| Write four things you could say to yourself (positive self-talk) to help you manage a tricky situation. For example – I don’t need to do this to be cool. |
| What else can you do to manage internal pressure? |
| What else can you do to manage external pressure? |
| Write about a situation where you have ‘saved face’ to manage a tricky situation. Remember not to include the names of others. |
| How did you feel? How did the other person feel? Did it affect your relationship with that person? |
| Do you think you can diffuse a situation with humour? Why? |
| How easy or difficult is it for you think quickly ‘on your feet’? Why? |

---

Rhianna didn’t want to catch the train without paying so she said her mum was picking her up.

Aaron didn’t want to skate through the foyer of the building so he said he was late to pick his brother up from his friend’s place.

Noah was worried about riding his friend’s motorbike so he said his uncle was coming over and he had to get home for a family barbecue.
Let’s find out about Andrew

Ben is Andrew’s friend and they are both 13. Ben wants Andrew to ask his 18 year old brother to let them take his car for a drive around the block on the weekend. The friendship is really important to Andrew, but he doesn’t want to ask his brother to do this.

Complete the 4 steps and make a decision for Andrew’s situation.

1. What’s the challenge? What exactly is the problem? What are the facts?

2. What choices are there? (Write at least two)

3. What are the negative and positive outcomes of each choice?

<table>
<thead>
<tr>
<th>Negative outcomes</th>
<th>Positive outcomes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Choice 1</td>
<td></td>
</tr>
<tr>
<td>Choice 2</td>
<td></td>
</tr>
<tr>
<td>Choice 3</td>
<td></td>
</tr>
</tbody>
</table>

4. What is your decision? Weigh up each idea. Which looks like the best option?

What would carrying out this decision look like or sound like? What needs to be done? Who does it? When?

Will this be a short-term or long-term decision? Try it. Assess it. Did it work?

Reflecting...

Write what you like about this problem-solving and decision-making process.

Think about a recent situation or problem that you have had. Would knowing this decision-making process have been helpful for you at that time? Why?

Which steps in this process would you be able to use in a situation where a decision needs to be made quickly?
Every day you will be making hundreds of decisions. Some are straightforward and will happen without you having to think too much, like what to eat for lunch – a sandwich or sushi. Other situations will require you to think more and make a decision that may have serious and lasting consequences.

Putting off making a decision when you’re faced with a tough situation can have a really negative impact on your health and wellbeing. You will probably feel stressed, anxious, confused, tired or pressured. Being able to make decisions and solve problems are all skills that help us to feel confident and hopeful.

**Problem-solving and decision-making**

When you have a problem these 4 steps can help you to work out some options and then decide on the best way to deal with the situation. It doesn’t mean you’ll always come up with the best solution but at least you’ll know you’ve tried.

**Decision-making tips**

1. **Set aside some time** to think about the problem. If you are feeling stressed about this, do something to take your mind off the situation for a while – go for a walk or swim, listen to some music or meditate.

2. **Think about your choices** as there are always different actions you can take.

3. **Think about the positive and negative consequences** of your choices and decide if the positives outweigh the negatives.

4. **Think about your goals and values** and how your decision will sit comfortably with you.

5. **Talk to someone else** to test your ideas. This might be a friend, teacher, counsellor, your parents or Kids Helpline. Getting someone else’s perspective and listening to their experiences about dealing with similar situations, can be very helpful. It isn’t always an easy thing to do but when you are trying to deal with a problem, asking for advice from someone else can definitely be helpful.

6. **Rethink your options** as you don’t always have to go with your original decision. But you do need to make a decision as delaying this can make you feel unhappy or uncomfortable within yourself.

7. **Make a plan** of how you will tell others, how you will manage the situation if they respond badly to your decision, and what outcomes you want to achieve for yourself and them.

Think about a problem that you have in your life right now. Use the 4 steps to decide how you can deal with your problem.

1. What is the problem?
2. What are all of your options?
3. What are the negative and positive consequences of each option?
4. What’s your decision?

Not every decision will be the right one. Do the best you can with the information you have.

Talk to someone if your problem is getting you down and ask for their advice.
If you read the biographies of elite sports people, actors, political and world leaders, they all talk about their dreams and goals. Having short-term as well as long-term goals is a great way to help you realise your full potential, and can give you a focus in your life, today and into the future.

Think of a goal that you would like to achieve before the end of Year 7. Follow each of the SMART goal steps and plan your goal.

**SET A SMART GOAL**
Where do you start? When you set a goal you need to be SMART.

**SPECIFIC**
Say exactly what you are going to do and what you want to achieve? (Who? What? Where? Why?)

**MEASURABLE**
How will you know when you have reached your goal? Set a date and put a timeframe to it.

**ACTION ORIENTATED**
List the steps that you need to take to reach your goal.

**REALISTIC**
Choose a goal where there is a real chance you will be successful. State why you believe it’s realistic.

**TIMEFRAME**
What must you do each day to make it happen? Be realistic and keep the end-by date in mind.

Think of a goal that you would like to achieve before the end of Year 7. Follow each of the SMART goal steps and plan your goal.

Now that you have planned out your goal using SMART steps, write your goal as a sentence.

My goal is ____________________________

---

Les Brown

Your goals are like the road maps that guide you and show you what is possible for your life.
Taking risks can be bad for your health.
What do I think? Agree or disagree?

Why do I think this?

What do other young people think?

Is this still your opinion after talking with your peers? Why?

Friends often influence peers to take risks.
What do I think? Agree or disagree?

Why do I think this?

What do other young people think?

Is this still your opinion after talking with your peers? Why?

Sometimes kids take risks to prove themselves, show off or be a ‘hero’.
What do I think? Agree or disagree?

Why do I think this?

What do other young people think?

Is this still your opinion after talking with your peers? Why?

Taking risks isn’t just about jumping off a cliff.
What do I think? Agree or disagree?

Why do I think this?

What do other young people think?

Is this still your opinion after talking with your peers? Why?
For each situation suggest any possible consequences or risks (positive and negative) and then give a rating level (1 low – 5 high).

Embracing risk-taking helps you overcome a fear of failure.

Trying new things and testing the boundaries is all part of being a teenager. But sometimes ‘stepping off the ledge’ and taking a risk, without stopping to think, may have negative outcomes.
Let’s face it; things can happen in our lives that really challenge us. Some of these things we can resolve relatively quickly and easily. Others may be more challenging. Sometimes we have to ask for help. It’s ok to do this. Think ... who could you go to for advice and help?

Positive steps to strengthen your friendships and support network

• Be the kind of friend you would like to have.
• Find others with similar interests and get involved with them.
• Don’t sit around and wait for others to come up to you.
• If you make promises to others, make sure you keep them.
• Be reliable, trustworthy and honest.
• When you are upset talk to someone. If they aren’t interested, talk to someone else.
• Don’t keep your feelings locked up inside.
• Reach out to others by being friendly, helpful and kind.
• Ask your family members for their support. Suggest that your family has a time each week where they can talk about anything they want.
• When you see someone who is upset ask them if they would like to talk and if they are okay.
• It’s okay to ask for help whenever you need it.

When you have a problem and want some advice, who do you call? Circle the answer for each of the following questions then add your scores to find out the strength of your support network.

1. How many friends at school and out of school do you have (don’t count online friends)?
   0. None
   1. Several friends
   2. One best friend
   3. Quite a few friends and at least one best friend

2. How many friends do you have that you could talk to about a school or personal problem?
   0. None
   1. One
   2. Two or three
   3. Four or more

3. How many friends do you eat your lunch with, swap favours with, loan items to or help with things like homework?
   0. None
   1. One
   2. Two or three
   3. Four or more

4. How many friends do you have that you could talk to about a school or personal problem?
   0. None
   1. One
   2. Two or three
   3. Four or more

5. How often do school friends and other friends visit you at home?
   0. Not very often
   1. About once a month
   2. Two or more times a month
   3. At least once a week

6. When you have a personal problem, how many family members or relatives can you talk to?
   0. None
   1. One or two
   2. Three or four
   3. Six or more

7. How often do others invite you to their homes or on outings?
   0. Not very often
   1. About once a month
   2. Two or more times a month
   3. At least once a week

8. Do many of your friends or family often come to you for help or advice or just to talk to?
   0. Hardly ever
   1. Sometimes
   2. Fairly often
   3. All the time

9. Would your friends or someone at school ask you what was wrong if you seemed upset about something?
   0. Probably not
   1. Probably

10. If you seemed upset about something, would someone at home ask you what was wrong?
    0. Probably not
    1. Probably

Add up your scores and write the total here _______.

If your score was:

Less than 10: Your support network could use some extra strength. You need to take some positive steps and work on building your friendships and support network.

10-20: Your support network is moderate and you might need to take some positive steps to strengthen it.

20-26: You have a strong support network. Your family and friends are there for you and you can count on them to support you and offer help when you have a difficult time.

Phone a friend

Let’s face it; things can happen in our lives that really challenge us. Some of these things we can resolve relatively quickly and easily. Others may be more challenging. Sometimes we have to ask for help. It’s ok to do this. Think ... who could you go to for advice and help?

Phone a friend

If you don’t have someone that you trust to share your problems with there are many trained listeners on help lines. If you feel out of your depth when trying to help a friend, speak to an adult or call a helpline.

Write the contact details for at least two help lines that young people can call or chat to online.

1
2
Sometimes friends just need someone to listen to their problems. This comes with a responsibility and you should read the fine print which says:

- Remember to just listen – don’t be too eager to jump in with your pearls of wisdom (unless they ask for your advice).
  - Don’t judge.

- Let your friend know that you are there for them – don’t be too pushy about it, they’ll talk when they’re ready.

- Keep it between the two of you. Never repeat anything that your friend has told you in confidence, unless your friend says something that makes you feel uneasy or you are worried they might hurt themselves or someone else.
  - Enjoy being able to help.

- You’re not a professional – you can offer empathy, company and maybe a bit of advice if asked but don’t take on the role of a counsellor.

- Refer them on – you can help your friend get the help they need by suggesting someone they can contact for advice.

WHERE TO GO FOR HELP

www.reachout.com.au Reachout is about helping young people to help themselves
www.ybblue.com.au/ Beyondblue is a national depression initiative for young people
www.kidshelp.com.au Kids Helpline is a 24 hour help line that can be called on 1800 55 1800
Each day we all travel in some way – by car, bus, train, bike or walking – so it makes sense that we know the road rules and how to stay safe as a passenger, cyclist and pedestrian.

Check your road safety knowledge. Read each statement and tick your answer.

</table>

Write your own poem about cycling, riding or skating based on the first verse of *Mulga Bill’s Bicycle*. Here’s an example.

**Silly Bill’s skateboard**

Was Silly Bill from Scarborough who caught the skating craze,
He threw away his old red bike he’d had for many days.
Bill donned his bright new bike helmet, knee and elbow pads,
He skated off along the path to catch up with the lads.
And as he whizzed it over the kerb, with thrill and daring speed,
His neighbour shouted out to Bill, ‘Slow down, or a doctor you will need!’
‘Whatever, mate,’ said Silly Bill, ‘from Trigg to Kalgoorlie,
From Broome to Meekatharra, there’s none can skate like me.’

**LEARN TO RIDE A BICYCLE. YOU WILL NOT REGRET IT...IF YOU LIVE. MARK TWAIN**
Even careful and experienced riders have a high risk of falling off their bike or being involved in a collision with a vehicle. So wearing a helmet that has been designed to protect a cyclist’s head when it hits something solid makes sense.

There are three major parts of a helmet design that all work together – the shell, the foam liner and the strap and buckle.

Shell

An important feature of a helmet is the thin plastic outer shell which can come in many colours and patterns. Most helmet shells are manufactured from PET plastic which is the plastic found in recyclable drink bottles or higher quality polycarbonate-style plastics. Inexpensive helmets typically use PET plastic, while more expensive helmets are moulded directly into the shell. These helmets use a higher-quality plastic that does not melt during the moulding process.

This shell covers the entire top surface of a helmet and is crucial because it holds the foam and strap of a helmet together during a crash. Often there is more than one impact during a crash so it is important that a helmet stays together and in place.

Another benefit of the helmet shell is that it is smooth, so it allows a cyclist’s helmet to skid along the surface of the road or pavement in a fall. This sliding motion helps protect a cyclist’s head and neck from being jammed into the road.

Foam liner

The thick foam liner is the most important component of a bike helmet. It cushions your head from the blow upon impact. The liner is usually manufactured of expanded polystyrene foam which is similar to the Styrofoam used in coolers. Many helmet liners use internal reinforcements of nylon or metal mesh that allow the polystyrene moulded shape to hold during the manufacturing process. The thickness of the foam can be of varying density to absorb differing rates of impact.

Strap and buckle

The strap and buckle is responsible for securing the helmet to the cyclist’s head while they are moving and in the event of a crash. The strap is really a combination of three components: the fabric, the stabiliser, and the buckle or clip. The strap is often made from nylon or polypropylene and is very strong. The strap is riveted to a helmet after it has been moulded or added across the top of the helmet, then covered by a shell.

Helmet fit

Helmet fit is important. Helmets should fit snugly, not tightly, upon the head and straps should meet and form a ‘V’ beginning just under the ear lobe before continuing under the jaw without pinching when the mouth is opened.

Answer these questions.

1. Why does the helmet need to have a hard smooth shell?

2. What purpose does the foam liner play in protecting the wearer’s head?

3. Why is it important to have the strap and buckle system?

4. What tells the purchaser that a helmet has been safety tested and has met Australian Standards?

5. Why do you think some cyclists refuse to wear a helmet?

6. Do you intend to wear a helmet when you ride?

---

Write an advertisement that promotes helmets while cycling or skateboarding. Include at least two interesting facts about helmets.

In Sweden it is only compulsory for children under 15 years of age to wear a bike helmet.
We’ve all heard some of the reasons that some cyclists use to get out of wearing a helmet – “it flattens my hair” or “my head gets hot”. Maybe. But it also protects your head.

Your job is to design a helmet for one of these customers.

1. Brainstorm a list of elements that will meet your customer’s needs but still maintain the safety features of a helmet.

2. Produce a poster that has a drawing of your helmet design. Include labels to explain the design features you’ve created. These must meet your customer’s needs but also comply with safety standards.

3. Decide how you will advertise the helmet so that other customers may want to purchase this new design.

4. Be ready to give a 2 minute presentation to your sales team.
What happens to the stopping distance as the speed of the bicycle reduces?

Write five factors that can increase the stopping distance of a bicycle.

1
2
3
4
5

Write five precautions a cyclist can take to ensure they are able to stop their bike quickly.

1
2
3
4
5
Choose a place to walk to in your local community - it might be your school, a friend’s house or the local shops. Read the checklist before you start and as you travel, note down any safety issues or the location of things that you think need to be changed to improve safety. At the end, circle an overall rating for each question.

Did you have enough room to walk safely?

<table>
<thead>
<tr>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
</tr>
</thead>
</table>

What were the problems?
- Footpaths were broken or cracked
- Footpaths started and ended
- Footpaths were blocked
- No footpaths
- Bikes sharing the footpath
- Shops with signs or tables and chairs on footpath
- Other

Locations of problems

Was it easy to follow the road rules?

<table>
<thead>
<tr>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
</tr>
</thead>
</table>

What were the problems?
- No crosswalks
- Traffic signals didn’t give enough time to get across the road
- Had to walk on the road because there were no footpaths
- Had to walk on the road because of obstructions
- Other

Locations of problems

Was it easy to cross roads?

<table>
<thead>
<tr>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
</tr>
</thead>
</table>

What were the problems?
- Parked cars blocked view of traffic
- Traffic signals didn’t give enough time to cross
- Road was too wide
- No median strip to wait on
- Trees or bushes blocked view of traffic
- Other

Locations of problems

Did drivers behave well?

<table>
<thead>
<tr>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
</tr>
</thead>
</table>

What were the problems?
- Backed out of driveways or laneways without looking for pedestrians
- Drove too fast
- Turned corners and didn’t give way to pedestrians who were crossing roads
- Drives up to make it through traffic lights or drove through traffic lights
- Double parked to let children out of car
- Other

Locations of problems

How does your neighbourhood rate?

Add up your ratings.

16–20 points Celebrate! You have a great neighbourhood for walking.

11–20 points Your neighbourhood is okay but it needs some work.

4–10 points Your neighbourhood needs a lot of work.

Rating scale

1 Very unsafe
2 Many safety problems
3 Some safety problems
4 Safe
5 Very safe

Were there any other problems for pedestrians?

Locations of problems
1. Set a SMART goal that shows how you will achieve your safety strategy.

2. Tell your teacher about your plan and listen to their feedback.

**Answer these questions.**

What is **one** thing you learnt about goal setting?

________________________________________________________________________

Did you achieve your goal? Why?

________________________________________________________________________

What is **one** thing you might do differently next time?

________________________________________________________________________

Did your strategy increase the safety of people in your community?

________________________________________________________________________
Map it out

So you want to start walking to school. Fantastic! It’s a great way to get your daily exercise and jumpstart your brain in the morning. But can you just walk out the door and take off? Well you can, but like anyone embarking on a journey there should always be some planning beforehand to stay safe.

Complete each of the tasks.

1. Locate your house and school on a map (or Google maps) and mark these with a circle.

2. Highlight the route you usually take when you walk to school. If you travel by public transport, locate the stop where you get off and then highlight the rest of the route you take to school.

3. Use a red pen to mark a cross (X) in areas along the route that have the potential to be unsafe for pedestrians and cyclists such as busy intersections, a railway crossing, and roads that don’t have footpaths.

4. Write each of the locations in the table. Explain why they are a hazard and possibly unsafe for pedestrians.

<table>
<thead>
<tr>
<th>Locations where pedestrians or cyclists may be at risk</th>
<th>Explain why this location could be a potential risk</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

5. Draw a circle around any features in the traffic environment that make it safer for you as a pedestrian such as footpaths, a crosswalk or school crossing, an overpass or underpass, pedestrian refuges in the centre of the road and traffic lights with pedestrian phasing or lower speed limit areas.

6. Write the location of these features in the table and explain why a pedestrian or cyclist should know about and use these.

7. Decide on the safest route possible, avoiding as many unsafe spots as possible.
Once you have all your plans in place it’s time to set a **SMART goal.**

Work out who has the skills that are needed for each task. For example, if someone is really good at designing – get them to create the posters or brochure. Make sure everyone knows what tasks they have to do and by when. Only a team effort will make this event successful!
Plan an excursion that will require your class to use public transport from school to a destination of your choice.

Here are some guidelines to help you plan your class excursion.

1. The excursion must start no later than 9:30am and finish no later than 2:30pm.
2. Bus and train fares must not be more than $2.50 per student.
3. Make a list of safety tips (eg stand back from the yellow line, disembark in an orderly fashion).

Use the Transperth website (http://www.transperth.wa.gov.au/Journey-Planner) to check:

- The bus/train times and best routes by using either the Journey Planner or Timetables and maps.
- How students can obtain a Student SmartRider (if they don’t already have one).
- The cost of the return journey for students and teachers.
- What the ‘on the spot’ fine may be if a student or teacher doesn’t have a valid ticket, SmartRider, or behaves in a manner that annoys other passengers.

Develop a plan for each stage of your journey.

<table>
<thead>
<tr>
<th>Journey description</th>
<th>Estimated arrival and departure times</th>
<th>Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>eg Walk from school to bus stop.</td>
<td>eg 9:30am – 9:40am</td>
<td>Nil</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Write a Code of Conduct that explains the responsibility of students using public transport and the safety rules that must be followed.

1. 
2. 
3. 
4. 
5. 

Have a look at the Get on Board website http://getonboard.transperth.wa.gov.au/
Make your call
When you call Triple Zero (000) you will be asked – “Do you want police, fire or ambulance?” Stay on the line while your call is transferred. Stay calm, don’t shout, and speak clearly and slowly. Be ready to answer these questions.

Where are you?
- Try to give the street number, street name, nearest cross street and the area.
- If you are in a rural area you will need to give the full address and distances from known landmarks and roads as well as the property name.
- If you are calling from a mobile or satellite phone, the operator may ask you for other location information.

Stay on the line and follow any instructions from the operator
- The operator may ask you to wait at a pre-arranged meeting point to help emergency services find the incident.
- You will be given advice over the phone to assist the person or your friend prior to the arrival of the ambulance.
- Stay on the line. Don’t hang up until the operator tells you to do so.

Other languages and text based services
- If you have a speech or hearing impairment call One Zero Six (106) to use the text-based service.
- If you can’t speak English, call Triple Zero (000) and ask for ‘Police’, ‘Fire’ or ‘Ambulance’. Tell them you can’t speak English. Stay on the line and a translator will be organised.

ICE stands for In Case of Emergency.
Having ICE in your phone may make it quicker and easier for emergency services or a passer-by to get in touch with someone who knows you and can help to make decisions if needed.
An ICE contact may also be helpful not just in an emergency but any time you get into difficulty.
- Enter the acronym ICE into your mobile’s contact list.
- Add the name and number of the person you want to be contacted in an emergency. It could be your mum or dad, a close friend or even your doctor. You could also store your blood type and any other relevant health information under your ICE entry.
- If you have an iPhone and your phone is locked, your ICE number can be accessed using Siri.

3-2-1 Reflect
Write 3 things you have learnt about the Triple Zero service.

1

2

3

Write the names of two people who you will have in your ICE contacts.

1

2

Write one question that you have about calling the Triple Zero service.

1

Find out more www.triplezero.gov.au
Learning basic first aid is as easy as DRS ABCD and can help you cope with an emergency. You may be able to keep a person breathing, reduce their pain or minimise the consequences of their medical emergency until an ambulance arrives.

- **Dangers**: Make sure that the area is safe for you and then the patient.
- **Response**: Check the patient for a response – ask their name – squeeze their shoulders. If there is a response – make the patient comfortable, check for injuries and keep watching the patient. If there is no response you need to send for help.
- **Send for help**: Call Triple Zero (000) or ask another person to make the call. Be ready to answer the operator’s questions as this will help the ambulance get to you as quickly as possible.
- **Airway**: Open the patient’s mouth and remove foreign material then put the patient in the recovery position. Open the patient’s airway by tilting their head with a chin lift.
- **Breathing**: Check that the patient is breathing by looking, listening and feeling. If they are breathing normally put them in the recovery position, keep watching their breathing, and treat any minor injuries. You will need to start CPR if the patient is not breathing.
- **CPR**: Do 30 chest compressions then 2 breaths. (If the patient is a baby use 15 compressions and 2 breaths). Keep doing CPR until the patient recovers and help arrives.
- **Defibrillation**: If a defibrillator is available, follow the instructions.

Find out if there is a defibrillator in your school.

Find out what you should do if a student requires emergency treatment at your school.

I feel confident to apply the DRS ABCD procedure in an emergency.

First aid courses

You can learn CPR and first aid with St John Ambulance Australia and Australian Red Cross.

www.stjohnambulance.com.au
www.redcross.org.au
Sometimes a situation you find yourself in might feel unsafe or dangerous, especially when you are out walking. Talk with your family and create a ‘getting home safely’ plan. Here are a few things to think about and include in your plan.

1. Know where you’re going. Work out how you’re getting there and who you are going with. Work out how you will get home.
2. Always take the safest route. A short cut might save time but it might not always be worth it.
3. Know who to call when you need help and have their contact number in your phone. Always have credit on your phone.
4. Make sure you have a SmartRider or enough money for a bus or train fare to get home.
5. Know what to say to your friends if they want you to do something that makes you feel uncomfortable or is unsafe.
6. Always have a Plan B just in case Plan A doesn’t work!

There are many benefits to walking apart from your physical health. You can save money, help the environment, be sociable and improve your mental health. So what can you do to make sure you get to your destination safely?

Consider what might put a pedestrian at risk and decide what a pedestrian could do to keep themselves safer.

<table>
<thead>
<tr>
<th>Why might pedestrians (of all ages) be at risk when they are walking in or near traffic?</th>
<th>How can a pedestrian reduce their level of risk and stay safer?</th>
</tr>
</thead>
<tbody>
<tr>
<td>They’re young and unable to make accurate decisions.</td>
<td>Always walk with someone older or an adult.</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>

</tr>
</tbody>
</table>

Write Plan A – include at least three things you can do to get home safely. Write Plan B – for when Plan A falls through.
Joe usually cycles to school and often sees some high school kids riding their bikes. The high school kids often ride as a big group and sometimes dink their friends on the handlebars of their bike. None of them wear helmets. Joe has heard some of them yell out rude comments to him and they always point and laugh. Joe’s parents have made him promise to always wear a helmet.

<table>

Azran loves going to the skate park and has been practising a few new tricks. Azran always wears a helmet while he is skating as he knows that head injuries are a possibility if he falls and hits his head. Most of the other skaters at the park also wear helmets and knee pads. Some of Azran’s mates like to skate on the road and play dodge with the cars and they often come to the park and try to convince Azran to join them.

Bob has a motocross bike. His parents have rules about when and where he can ride his bike on the farm. Bob knows if he breaks the rules his parents will sell his bike. Some of Bob’s mates often take their bikes to the area out near the local rubbish tip and make jumps and tracks to ride over. They have asked Bob to join them this weekend.

<table>

What skills or strategies might these characters also need to be able to manage the situation they are in? (eg decision-making, speaking assertively, negotiation, help seeking, problem-predicting, goal setting, refusal comments)

Joe

Shaan

Azran

Bob

Which of these skills or strategies are you able to use well?

What skills or strategies do you need to practise to manage challenging or difficult situations?
We all have one. Some share it more than others. Some don’t always agree with others. When lots of us have the same one, we can make a difference. Any idea what ‘it’ is? That’s right, it’s an opinion. Whether it’s about music, football teams, movies, games, food or clothes, we all have a different opinion. Knowing that it’s okay for everyone to have their own opinion and respecting each other’s opinions is the key to helping us maintain positive and respectful relationships with our friends, family and peers.

So why do we have differing views? We can be influenced by a number of things, such as our upbringing, our culture, our parents and friends, religion and the media. So when someone else has a different view to you, try to understand why. Put yourself in your friend’s shoes and ask if you’d believe the same things if you’d had the same experiences as them.

Remember you don’t need to share the same opinion as others but you do need to be respectful. Being rude and dismissive of your friend’s opinion will most likely result in them getting annoyed at you and might wreck a great friendship.

Read each of the statements and tick the box that best represents your opinion.

<table>
<thead>
<tr>
<th>Strongly Agree</th>
<th>Agree</th>
<th>Disagree</th>
<th>Strongly Disagree</th>
</tr>
</thead>
<tbody>
<tr>
<td>Teaching Year 7 students about road safety is a waste of time.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Using public transport is a right not a privilege.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Most young people understand that what they do in and around traffic can affect themselves and others too.</td>
<td></td>
<td></td>
<td></td>
