TRAFFIC SIGNALS

Traffic control signals tell us who can go and who has to wait. They are there to protect road users and regulate traffic.

1 Write **T** (TRUE) or **F** (FALSE) next to each statement.

- A driver must always obey the signals facing them.
- When nearing a set of traffic control signals, a driver must be prepared to stop if necessary.
- You can do a U turn at an intersection with traffic control signals if the light is green.
- Traffic control signals always have the coloured lights in the same order.
- Traffic must wait behind the stop line marked on the road near the traffic signal when the light is red.
- Drivers cannot drive forward at a flashing pelican (pedestrian) signal even if there are no pedestrians using the crossing.

- 3 This traffic control signal means you can:
- either go straight ahead or turn in the direction of the arrow if it is safe to do so
 - go straight ahead but not turn in the direction of the arrow
 - only turn in the direction of the arrow.

2 If the traffic control signals are not working, what should the driver do?

4 What does it mean when the yellow light is flashing at an intersection?

Answers can be found in 'Part 3 Major road rules and additional safety advice' of the Drive Safe handbook www.transport.wa.gov.au/mediaFiles/licensing/DVS_DL_B_DriveSafeFull_f.pdf
