Traffic control signals tell us who can go and who has to wait. They are there to protect road users and regulate traffic.

1) Write T (TRUE) or F (FALSE) next to each statement.
   - A driver must always obey the signals facing them.
   - When nearing a set of traffic control signals, a driver must be prepared to stop if necessary.
   - You can do a U turn at an intersection with traffic control signals if the light is green.
   - Traffic control signals always have the coloured lights in the same order.
   - Traffic must wait behind the stop line marked on the road near the traffic signal when the light is red.
   - Drivers cannot drive forward at a flashing pelican (pedestrian) signal even if there are no pedestrians using the crossing.

2) If the traffic control signals are not working, what should the driver do?

3) This traffic control signal means you can:
   - either go straight ahead or turn in the direction of the arrow if it is safe to do so
   - go straight ahead but not turn in the direction of the arrow
   - only turn in the direction of the arrow.

4) What does it mean when the yellow light is flashing at an intersection?
